

Introducing

Video Visual Feed™ (VVF)

- Interpreters **view what is behind them in real time** while facing forward and maintaining eye contact with deaf consumers
- Immediate access to speakers' non-verbal cues & visual aids allows interpreters to **better understand & deliver the message smoother**
- Presenters & consumers experience **less disruptions**

Seeking pilot testers:

- deaf & deafblind consumers
- hearing & deaf interpreters
- hearing consumers
- interpreting agencies

For pilot testing, questions, demos, consulting and assignments, please contact:
